## SET UP BETTER SECURITY TO PROTECT YOUR MEDICAL RECORDS WITH TWO-STEP VERIFICATION
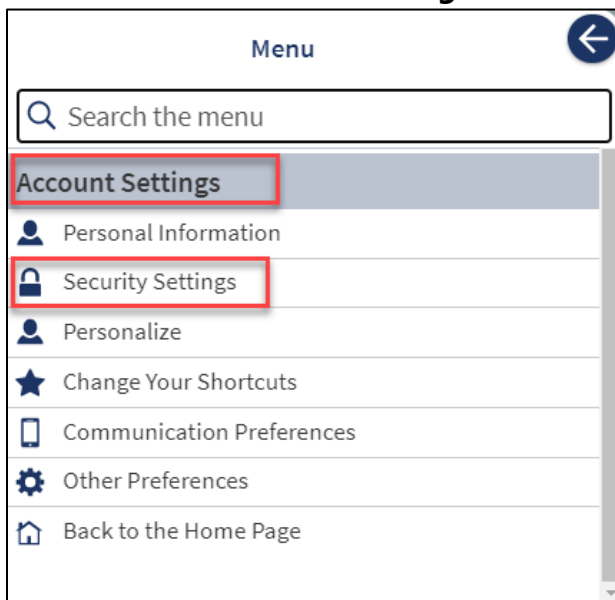

Two-Step verification adds security to your myHealth Online account by protecting against stolen passwords. If your password is hacked or guessed, it is not enough to give an intruder access. A password alone is useless without approval at the second step, a verification code sent by text to your phone or by email, that needs to be entered each time you log in.

Set Up Two-Step Verification from Computer

1. Logon to your **myHealth Online** account from your computer
2. Click **Menu**,

3. Scroll down to **Account Settings**, Select **Security Settings**

4. Under Two-Step Verification Settings, select **Turn on two-step verification**

5. Verify Your Identity – enter your password and click **Continue**

6. Select how you would like to receive the code either **email** or **text message to your phone**.

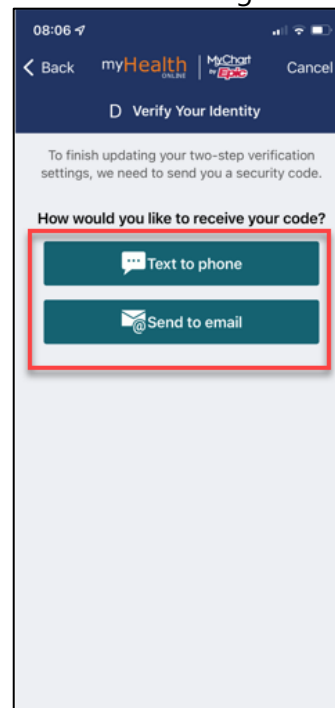

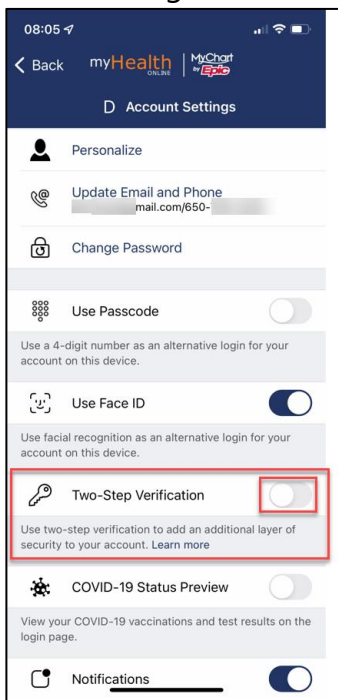

7. Enter the code and click **Verify.**

Set Up Two-Step Verification from Mobile Device

Logon to your **myHealth Online** account

3. Click **Menu**

2. Scroll down to Account Settings, select **Account Setting.**

4. Under Two-Step Verification Settings, tap the button to right to turn on

5. Select how you would like to receive the code either Text message or Email
